

H48W 35 - GRADED UNIT 2

TYPE OF GRADED UNIT: PROJECT

ASSESSMENT INSTRUMENT: PRACTICAL ASSIGNMENT

INSTRUMENT OF ASSESSMENT — INITIAL BRIEF FROM CLIENT

Focus Football are a Scottish based football fanzine, tracking a particular team playing in either the Scottish Championship league, the Scottish League 1 and Scottish League 2. These include teams playing in cups and leagues. Fans can subscribe to the system as either a partial subscription which is free or full subscription for a small fee.

They are looking for a new computerised system that will allow their subscribers to keep track of :

- Player details for the team
- Game fixtures and results
- League Table Updates
- Match report
- League and cup details
- Weekly news Letter with current club information.
- List of cooperate events
- Update user details

The membership secretary also wants to be able to store details of all members both for legal reasons and to allow relevant information to be sent to all members. They will use the computerised system to keep track of their members. Further details relating to the proposed system can be obtained from the client (i.e. your lecturer), who will be available for a discussion in a weeks' time.
