STAGE 3 — EVALUATION (20% OF FINAL MARK)

You should have successfully completed (obtained a minimum of 50% of the available marks) the development stage before progressing to the evaluation stage.

Now that Stage 2 — Developing is complete you are expected to produce a formal report evaluating the effectiveness of the approach/strategy taken over the whole of the project. All essential information is to be included: the original project plan, analysis of the current system, design of proposed system, implementation planning, implementation, testing and documentation.

Your evaluation will be graded on all activities and the degree of autonomy in coming to your conclusions. Your evaluation of the product should consider the following:

Topic	Possible Marks
An outline of the assignment and to what extent the solution met the original requirements of the assignment brief	
An assessment of the strengths and weaknesses of the outputs of the practical assignment	
Recommendations for any future development of the solution and reasons for these recommendations	
A summary of any modifications to the project plan, solution design and/or implementation that were made during the project. Including reference to any unforeseen events and how they were handled	
Identification of any knowledge and skills which have been gained or developed while carrying out the project assignment and how the actions/process of carrying out the project could have been improved
